

## Willach introduces a new generation of pharmacy robot for the British market

*Birmingham, 16<sup>th</sup> September 2011. After successful launches in several European countries, Willach introduces the [Consis E robot](#) at [the Pharmacy Show at the NEC in Birmingham](#). [Consis E](#) stores and dispenses the complete range of medicine packages in a pharmacy.*

Are you facing the issue of how to prevent queues in your pharmacy, streamline procedures and improve safety by preventing dispensing errors? With [Consis E](#), pharmacies are enhanced by a central control centre that manages medicine logistics and sets the heartbeat of work processes.

All processes, from stocking, through storage, to the dispensing of medicines, are perfectly coordinated and controlled by [Consis E](#). And it does so with such smoothness and speed that you are hardly aware of it. Except in the amount of time you've won back, the huge number of routine tasks from which your team has been relieved and the increased satisfaction of your customers.

- Increase efficiency and serve your customers more quickly by improving your forward dispensing services
- Free up time to advise customers thanks to [fully automated stocking with the Consis Stockmaster](#)
- Reduce dispensing errors thanks to [fully automated labelling with the Consis Labelmaster](#)
- Gain space to create consulting and treatment rooms by using cutting-edge technology.

The [Consis E](#) can even handle opened split-packs, which means that almost every possible permutation of medicine packages is managed by the robot.
